BRIESER CONSTRUCTION COMPANY SITE SAFETY MEETING - TOOL BOX TALK

BEING A GOOD SPOTTER

There are many important aspects of being a good spotter. The driver or operator must be able to see you. Positive eye contact and a safety vest are always critical. They cannot see you in their blind spots. Things to look out for before backing or pulling a truck or machine are:

- Foot Traffic
- Adjacent work
- Groups
- Open excavations
- Electrical Cords
- Crossing Roadway
- Traffic Bollards
- Fence posts & cones (just to name a few)

When backing a vehicle up on site both the driver and spotter should agree on exactly where to stop the vehicle. With proper planning and a clear path, you shouldn't have any trouble being a good spotter.
