

**BRIESER CONSTRUCTION COMPANY
SITE SAFETY MEETING - TOOL BOX TALK**

COLD WEATHER CONTINGENCY PLAN

It always seems like the cold weather and winter season catches us off guard, and unprepared. However, with a cold weather contingency plan a lot of inconveniences and hazards can be avoided. Let's start with the individual employee being prepared, properly dressed, with a cold weather attire hats, gloves, insulated work boots, rain gear etc.

Having the proper tools on hand and readily available also will prevent delays and improve hazardous conditions. Example would be snow shovels, ice scrappers, salt, and window scrapers for vehicles. Also prepping the jobsite for such conditions such as warming tents for hose and pumps, concrete blankets, for covering equipment and work areas.

Preparing vehicles for extreme weather which may include fuel additives for moisture prevention and freeze ups, jumper cables, removing ice and snow from around vehicles, everyone can still have a safe workplace in any type of weather conditions if overall prepared and planned ahead.
